

# Charitable Purpose

Next-Level 'Academy 23' Coaching is a charitable project that looks to bring together multiple charitable purposes. The overall aim is to raise money to fight Chronic Kidney Disease (CKD). A condition that our son in Jan 2023 was diagnosed with by the Evelina Children's Hospital in London England. So the public benefit here would be **health and saving lives**.

The charity aims to fundraise through the vehicle of sports coaching. Therefore Combining the charitable purpose health, saving lives, education and armature sport. The project would **educate** young people from local secondary schools to become coaches in sports and develop leadership skills to become young sports leaders who coach primary age children sports.

Creating the opportunity for the next generation of young people to be certificated in first-aid, coaching, leading and **organised sports**.

A purpose of the project will be to give regular opportunity for the secondary school age sports leaders to coach primary school age students.

This would be done in a safe, friendly and values based way. Allowing the primary age children to enjoy learning the **educational** value and lifelong **benefits of playing sports**. Whilst improving the necessary skills to help them to develop to the next-level in their chosen **sport**.

In summary, The next-level 'academy 23' coaching charity is a project committed to public benefit and the charitable purposes of

1. Helping the Evelina Children's Hospital fight CKD and care for the many children and their families diagnosed with the chronic kidney disease. **(Health and Saving Lives)**
2. Together with the education and development of our young people in leadership, coaching and organising sports. **(Education)**
3. Allowing primary age students to improve their skill level in a safe, fun, friendly variety of sports **(Amateur Sport)**
